WEB3 TRACK PS

PS 01 :- Personal Onchain AI Treasurer

REQUIREMENTs

Agent manages:

savings

yield

subscriptions

LP positions

bill payments

daily budget

WEB3 TRACK PS

PS 02 :- Infrastructure for Autonomous Agents

REQUIREMENTs

Deploy agent “bots” that take autonomous onchain actions based on intents.

WEB3 TRACK PS

PS 03 :- Agent Marketplace

REQUIREMENTs

1. trading agent
2. farming agent
3. scheduling agent
4. portfolio rebalancing agent
5. content reply agent
6. business assistant agent

WEB3 TRACK PS

PS 04 :- Agentic Protocol

Problem:

Agents are starting to make decisions that have rea
consequences, but there's no auditability or explainability layer.

Build:

A protocol that:

- logs agent decisions
- explains why a decision was made
- allows humans (or DAOs) to challenge or verify actions

WEB3 TRACK PS

PS 05 :- AI Wallet Assistant

Problem:
New users don’t understand what’s happening in their wallet — it feels risky.

Build:
An AI assistant that:
explains transactions in simple language
warns before risky actions
answers questions like “what will happen if I sign this?”

WEB3 TRACK PS

PS 06 :- Intent-Based Token Swap

Problem:
Swapping tokens requires too many steps.

Build:
User just types:
“Convert 1 ETH to best possible USDC rate”

Agent:
finds best route
executes (or simulates) the trade

WEB3 TRACK PS

PS 07 :- AI + Web3 Event Matchmaker

REQUIREMENTs

Problem:

People go to events but don’t meet the right people.

Build:

A system where:

- users share interests/goals
- AI suggests who to meet
- optional: generate intro messages

WEB3 TRACK PS

PS 08 :- Spotify for Opportunities

What it feels like:

-
- Like Spotify, but instead of songs, it feeds you:
- airdrops
- jobs
- communities
- projects

Experience:

- swipe through opportunities
- AI learns your taste
- “Because you explored X, try this”
- Web3 underneath: wallet + on-chain activity
- AI layer: recommendation engine

WEB3 TRACK PS

PS 09 :- Duolingo for Web3

Duolingo but for:

-
- crypto basics
- DeFi
- NFTs

Experience:

- learn → do → earn
- small tasks like:
- swap tokens

mint NFT (testnet)

- Web3: proofs of completion
- AI: adapts difficulty

WEB3 TRACK PS

PS 10 :- Social Wallet

- What it is:
- A feed showing:
- what people you trust are doing on-chain
- trends within your circle
